

Lascaux Perlacryl

Lascaux Perlacryl is an iridescent acrylic paint for use in design and decoration as well as in architecture. This fascinating colour range consists of 12 pure, strong full tones complimented by yellow gold, red gold, pearl white and pearl black. Lascaux Perlacryl is portrayed by an intensive, iridescent luster and an unusual brilliance and lightfastness.

Properties

- highly pigmented
- iridescent colours
- lightfast and non-ageing
- dries scratch- and water-resistant
- high gloss level
- maximum coverage
- very good coating flexibility
- elastic, firm and block resistant

Usage

- ideal for decoration and design
- for murals

Applications

Lascaux Perlacryl can be diluted with water or applied directly onto practically any ground. The iridescent colour range is suitable for use with virtually all painting techniques using brush, roller, airbrush and other painting tools. The characteristic pearl luster effect varies considerably depending upon dilution and thickness of application.

Priming:

According to the absorption level and texture desired, we offer corresponding products for rigid and flexible base coats (Lascaux Primer and Modelling Pastes).

Mixing:

To attain a textured surface, Lascaux Perlacryl can be mixed with Lascaux Impasto Gel. Mixing with other acrylic colours will result in a reduced pearl luster effect.

Varnishing:

All acrylic works can be lastingly protected and are subsequently easy to clean by using Lascaux Transparent Varnish. In doing so, however, the pearl luster effect is somewhat reduced. A special transparent varnish with an UV absorber is available for outdoor applications.

Outdoor applications are limited to tones with maximum lightfast properties (***) .

Composition

Lascaux Perlacryl is basically comprised of a non-toxic synthetic adaptation of Mother-of-Pearl.

Delivery form

30ml, 85 ml, 250 ml and 500 ml bottles
3 litre and 5 litre buckets
